## Your Information Partner in Greater China

In China, knowledge is power. Intelligence about breaking news, market segments, public opinion and competitor activity is the key to developing more effective marketing strategies, communications responses and ultimately business competitiveness.

Wisers is the leading provider of time sensitive and mission-critical information from Greater China. The technical foundation that underpins our service was originated in 1992 as an academic research project at the Chinese University of Hong Kong. This core technology led to the incorporation of Wisers Information Limited in 1998. In 1999, international private equity firm, Walden International Investment Group provided funding from the Hong Kong SAR Government's Applied Research Fund for the further development of Wisers' services.

Since 1998, Wisers has built an unrivalled reputation for delivering market information. Our clients include local blue chips and Fortune 500 companies, international banks and financial institutions, as well as the governments of the Peoples Republic of China and the Hong Kong Special Administrative Region. Our core offerings, i.e. Wisers Information Portal, WiseSearch, WiseNews, WiseEnterprise and WiseLIVE, help them uncover market intelligence, stay updated, spread knowledge through their organizations, and measure and refine their own communications.
